

SunSmart America™ Elementary School Curriculum

Elementary School Sun Safety Educational Resource

The SunSmart America™ K-5th grade resource offers primary teachers ready made curriculum lessons and activities to base sun protection learning experiences. This resource is cross-curricular, interactive and FUN!!! A study conducted by the Melanoma Foundation and the University of Miami found that the SunSmart Elementary School Curriculum increases students knowledge as well as changes their behavior toward sun safety.

SunSmart America™ Middle School Curriculum

Middle School Sun Safety Educational Resource

The SunSmart America™ Middle & High School resources promote the SunSmart message and provides teachers with information and a range of classroom activities on skin cancer and sun protection. The educational information is arranged in five cross-curricular topics. Each topic contains a SunSmart Education Lesson, Pre & Post tests and several activities.

These resources are recommended for Physical Education, Health, Science and English Teachers.

These resources are benchmarked to meet FCAT Standards.

SunSmart America™ High School Curriculum

High School Sun Safety Educational Resource
